

**Applique Cutting on the Scan N Cut with Nancy Lewis**

**Wednesday, 10/25/17 from 10am-1pm**

That great little cutting machine you just purchased is an awesome tool. Join Nancy as she walks you through how to cut a fused fabric applique project called Flourishes.

Nancy will show you all the steps you need to know from scanning in the pattern to fussy cutting your prepared fabric. She will also cover how to use the SVG cutting files for Flourishes.

*Not for first-time users, a working knowledge of basic Scan N Cut operation and Canvas is a must for this class.*

Class Fee: \$35 – SKILLS: Confident Beginner

**Supplies:**

- Applique Pattern: Flourishes – required
- Fabric as required in the pattern already prepared with “Heat & Bond Lite\* fusible bonding product
- Scan N Cut Machine
- Fabric support sheet
- Low tack cutting mat (12 x 24 optional as pattern is larger)
- Scanning mat (12 x 24 optional as pattern is larger)
- All scan n cut accessories including a new blade, teal cartridge spatula, stylus
- Scissors

**NOTES:**

- We will be cutting the project pictured on the forefront of the pattern in this class. You may choose your fabric accordingly.
- \*Heat & Bond or Heat & Bond Lite are currently the only fusible products recommended for fabric cutting on the Scan N Cut
- NO sewing machines needed - we will not be sewing, only prepping, cutting and fusing!

Class project

**Class Prework:**

Please have all your fabric pieces fused with Heat & Bond prior to class. Proper fusing takes a bit of time to do right and having this already done will allow more class time for cutting.
